

# Independent Quality of Service Survey in Pakistan – Cities

First Quarter 2025

Enforcement Division  
PTA | F-5/1, Islamabad

## Executive Summary

### 1. QUALITY OF SERVICE SURVEY

Pakistan Telecommunication Authority (PTA) has carried out independent Quality of Service (QoS) Survey in various cities of Pakistan during 1<sup>st</sup> Quarter 2025. During the survey, the performance of Cellular Mobile Operators (CMOs) has been assessed in accordance with the Cellular Mobile Network QoS Regulations 2021. The survey comprised approximately 35,500 Voice Calls and SMS while 0.255 million samples were checked to measure the broadband performance of CMOs. Summary of the drive, city wise and overall results are below:

## Quality of Service Survey

### 1. KEY PERFORMANCE INDICATORS (KPIs)

All CMOs are required to meet or exceed the benchmark of QoS KPIs as provided as per Cellular Mobile Network Quality of Service (QoS) Regulations 2021. To ensure accurate benchmarking, PTA is collecting and analyzing a statistically significant sample of minimum 200 calls and data sessions, enabling the evaluation of critical performance parameters.

### 2. SURVEY CITIES

Quality of Service Survey was conducted in 15x cities of Khyber Pakhtunkhwa, Punjab, Sindh & Balochistan during January to March 2025. Survey routes were selected in a manner to cover the maximum population area of the respective surveyed cities. The names of cities along with survey dates are mentioned in Table 1.1: QoS Survey Cities & Dates:

## 7. MOBILE BROADBAND SERVICE – LATENCY

Latency, while not a traditional KPI (non-service KPI), is a vital metric for Mobile Broadband Performance, as it directly affects user experience. During the survey, Network Latency was measured by calculating the ping between different websites and 3<sup>rd</sup> Party Test servers. Results are shown in Table 7.1: Automode Latency and Table 7.2: 3<sup>rd</sup> Party App Latency.
