

Responses against the queries raised by vendors over Web application Firewall RFP.

Sr#	Queries	Response
1	<p>Annex C (II) Sr#.1 Throughput must be greater than 2Gbps, internal storage 2Tb minimum-</p> <p>Query: The nearest model either comes with 1.3Gbps with 2TB storage or with 2Gbps having 850GB storage. Please advise the minimum acceptable specifications to propose suitable model accordingly.</p>	<p>For encouraging the healthy competition, the relevant clause of Bid Document i.e. Sr#.1 of Annex C (II) is updated as below: Throughput must be greater than 1Gbps, internal storage minimum 2TB.</p>
2	<p>Annex C (II) and (III) Sr#.2 What type of load balancing is required i.e. L4 or L7 along with WAF?</p> <p>Query: Usually, WAF needs to load balance http/https/ftp (L7) application. Kindly confirm</p>	<p>For encouraging the healthy competition, the relevant clause of Bid Document i.e. Sr#.2 of Annex C (II&III) is updated as below: Layer 7 load balancing is must however Layer 4 load balancing will be considered optional.</p>
3	<p>Annex C (I) Sr#.1 Throughput must be greater than 2Gbps, internal storage 2Tb minimum.</p> <p>Query: In our case, we have FWB-1000E which has throughput 1.3Gbps and 2TB storage. Whereas FWB-2000F has throughput 5Gbps but 960Gbps storage. So technically none of our FWB matches above requirement.</p>	<p>Same query as point # 1. Specification will be . Throughput must be greater than 1Gbps, internal storage minimum 2TB.</p>
